MUHAMMAD IRFAN LONE

Operations & Automation Lead · AI Agents · Creative Web

contact@irfanlone.com · irfanlone.com · github.com/Lone2000 · linkedin.com/in/muhammad-irfan-lone · Remote · EU/UK hours

PROFILE

I run the work and build the machine. At a US cybersecurity SaaS I owned software operations end to end: scoped features with engineers, wrote the specs, led a small team and signed off every release. Then I automated the slow parts myself: Claude agents, MCP servers and n8n / Make.com workflows that run unattended, with a person approving what matters. I also build creative web in TypeScript, React and Three.js. **11 live demos with launch videos: irfanlone.com**

EXPERIENCE

Software Operations Manager · Vectra View
Dec 2025 – Sep 2026

USA · Remote

- Owned the software operations layer of a cybersecurity GRC / audit-compliance SaaS: scoped features with engineering, wrote specs, ran the design and engineering cadence, and personally QA'd and signed off every release.
- Built a Claude-agent QA pipeline: n8n runs a structured prompt library over each PRD and returns regression and happy-path test cases to the sprint board behind human sign-off gates. **Test-case authoring time down ~50%.**
- Shipped a Claude "Regular Comment" skill with a built-in review layer (quality feedback, reasoning and suggestions per output); the team adopted it as a production workflow, with a how-to guide I wrote.
- Led a small cross-functional group plus content operators: split ownership, wrote SOPs and ran leave handovers with **no critical threads dropped**.

Marketing Manager, Outbound & Automation · Revvye
Jul 2025 – Present

Dubai, UAE · Remote

- Lead a **3-person** outbound and community team against daily KPIs. **Scaled monthly outreach 3× (1,000 → 3,000 touchpoints) with the same headcount** by standardising templates, adding AI-assisted personalisation and enforcing quality criteria.
- Built the KPI dashboards (activity, response rate, pipeline conversion) and report results to leadership weekly.
- Built an n8n parent-orchestrator with 8 sub-workflows that qualifies LinkedIn accounts, then leads, researches recent activity and drafts connection hooks, merging 3 data sources into one pipeline that writes back to Notion.

PHP / WordPress Developer & Project Coordinator · BlackBoardd
Mar 2024 – Jul 2025

Remote

- Delivered WordPress / PHP sites end to end for **10+ B2B clients**: requirements, scoping, build, payment-gateway integration and post-launch support.
- Cut POS SQL query time from **~15 s to ~3 s** with indexing and query rewrites; ran weekly ETL and validation over 5,000+ records. Lifted organic traffic **+20%** with on-page and technical SEO fixes.

SELECTED WORK — LIVE DEMOS AT IRFANLONE.PAGES.DEV

Automation & AI agents

- **VectraView QA Bot** Python · Playwright · Claude Agent SDK — Reads a PRD, drives the browser through every acceptance criterion and writes an HTML report: pass / fail / inconclusive with evidence. demo ↗
- **Bubble Database Assistant** Node · MCP · Bubble Data API — Read-only MCP server so a team can query a production Bubble.io database in plain English: 3 tools, 10 exposed types, writes refused. demo ↗
- **PCI DSS Control Extractor** Python · Claude vision — 296 scanned pages → 328 structured controls for ~$0.40, resumable, merges controls across page breaks. Same method: HIPAA (123), NIS2 (164). demo ↗
- **BrandVoice** Python · PRAW · Claude — Reddit replies as a brand, openly: disclosure footer enforced in code, moderator permission required, human approves every post, 30 guardrail tests. demo ↗
- **Claude Memory Agent** Markdown + YAML · git-versioned — File-based long-term memory for Claude Code: four typed memories and an auto-loaded index, no vector DB. In daily use.
- **Personal Assistant** Claude Projects · memory files — A second-opinion engine: options, a likelihood for each, and receipts citing the stored facts behind every number; asks when data is missing. demo ↗
- **Grind Bot** discord.py · Google Sheets API · Reddit API — Discord bot that hands out tasks from a sheet first-come-first-served, behind a Reddit karma gate, with cooldown roles. demo ↗

Creative web

- **Feels Like Today** React 19 · TypeScript · Three.js / R3F · GLSL · GSAP — Small interactive 3D rooms for feelings with no easy name; each has its own scene, interaction, post-processing and generated sound. demo ↗
- **Starry Post** WebCrypto · Node · zero dependencies — Letters encrypted in the browser (PBKDF2 → AES-256-GCM); the server and git only ever hold ciphertext. Generated SVG sky, Web Audio. demo ↗
- **Sunshine Jar** Vanilla JS · Node · PWA — Shared corkboard where git is the database (commit per write, sha-race retry), status derived from an event log, Web Push written from scratch (VAPID, aes128gcm). demo ↗
- **Meridian · Kobe Direct** React 19 · TypeScript · Tailwind · Framer Motion — A three.js globe of export routes with a freight / ETA calculator, and a filterable used-car marketplace with React Router. live ↗

SKILLS

AI & automation: Claude Code, Claude Agent SDK, MCP servers, Claude skills, n8n (self-hosted), Make.com, Zapier, Playwright, human-in-the-loop design

Leadership & ops: Specs / PRDs, release sign-off, QA strategy, SOPs and onboarding, KPI dashboards, cross-timezone async teams, Linear / Jira, Notion

Web: TypeScript, React 19, Three.js / React Three Fiber, GLSL, GSAP, Tailwind, Vite, Node.js, WebCrypto, PWA / Web Push, Cloudflare Pages

Data: SQL (MySQL, PostgreSQL, SQLite), Python (Pandas, NumPy), Google Sheets API, ETL and validation, Power BI, PHP / WordPress

EDUCATION & CREDENTIALS

BS Computer Science, University of the People (USA) 2025

CGPA 3.94 · President's List ×3 · cybersecurity concentration (network & application security capstone). Associate's in CS, 2023. Cambridge A & O Levels.

IELTS Academic 8.0 (Listening 9.0, Speaking 8.5) · HackerRank Advanced SQL · Google Cybersecurity · IBM Data Analyst · Google IT Support · Languages: English (professional), Urdu (native), Punjabi
